It's time to go electric

Your guide to the UK's best EV bundle, from Octopus.

The future starts today.

All over the world, people are saying no to the cars of yesterday.
No to the fumes.
No to expensive fuel.
No to the old.

The future of our roads is green.
The future is electric.

A whole new world of driving

Technology revolutionised your phone, now it's in your car. You can drive over 150 miles on a single charge in most electric cars. Many people can't go back once they experience the instant driving power of electric. These cars aren't just coming, they're here, and **they've changed the game.**

As easy as charging your phone

Home charging is super easy, just plug in and go. You start each day with a full charge and never have to detour for diesel again. On longer road trips you can take a pit stop at one of the **15,000** public charge points and top up as fast as 80% in 20 minutes. Now if only they could do that for your mobile too.

Fill up for a fiver

Save up to 90% of your fuel costs compared to a traditional car. Add in government grants for cars and chargers (which we can help you with) and going electric doesn't have to break the bank. **Don't keep burning your money on diesel.**

A cleaner future

Electric cars have zero emissions. Zero smoke, smog or CO₂. That means less asthma, healthier playgrounds and a huge step towards **a sustainable future.**

All you need to get moving

Only Octopus bring together a handpicked range of **the world's best EVs**, a team of **impartial experts** to help you choose (and get you a great price), your own **smart charger** that saves you money when you charge, **100% renewable electricity** for your car and home, and a **free support helpline** for as long as you remain a customer.

A great deal on the right EV

We've handpicked the best cars available for a wide range of people – and then we work with the manufacturers to get them for you at the right price. Our team of experts will help you make the most of incentives, discounts and grants, and ensure you're getting a great deal.

The power to get you moving

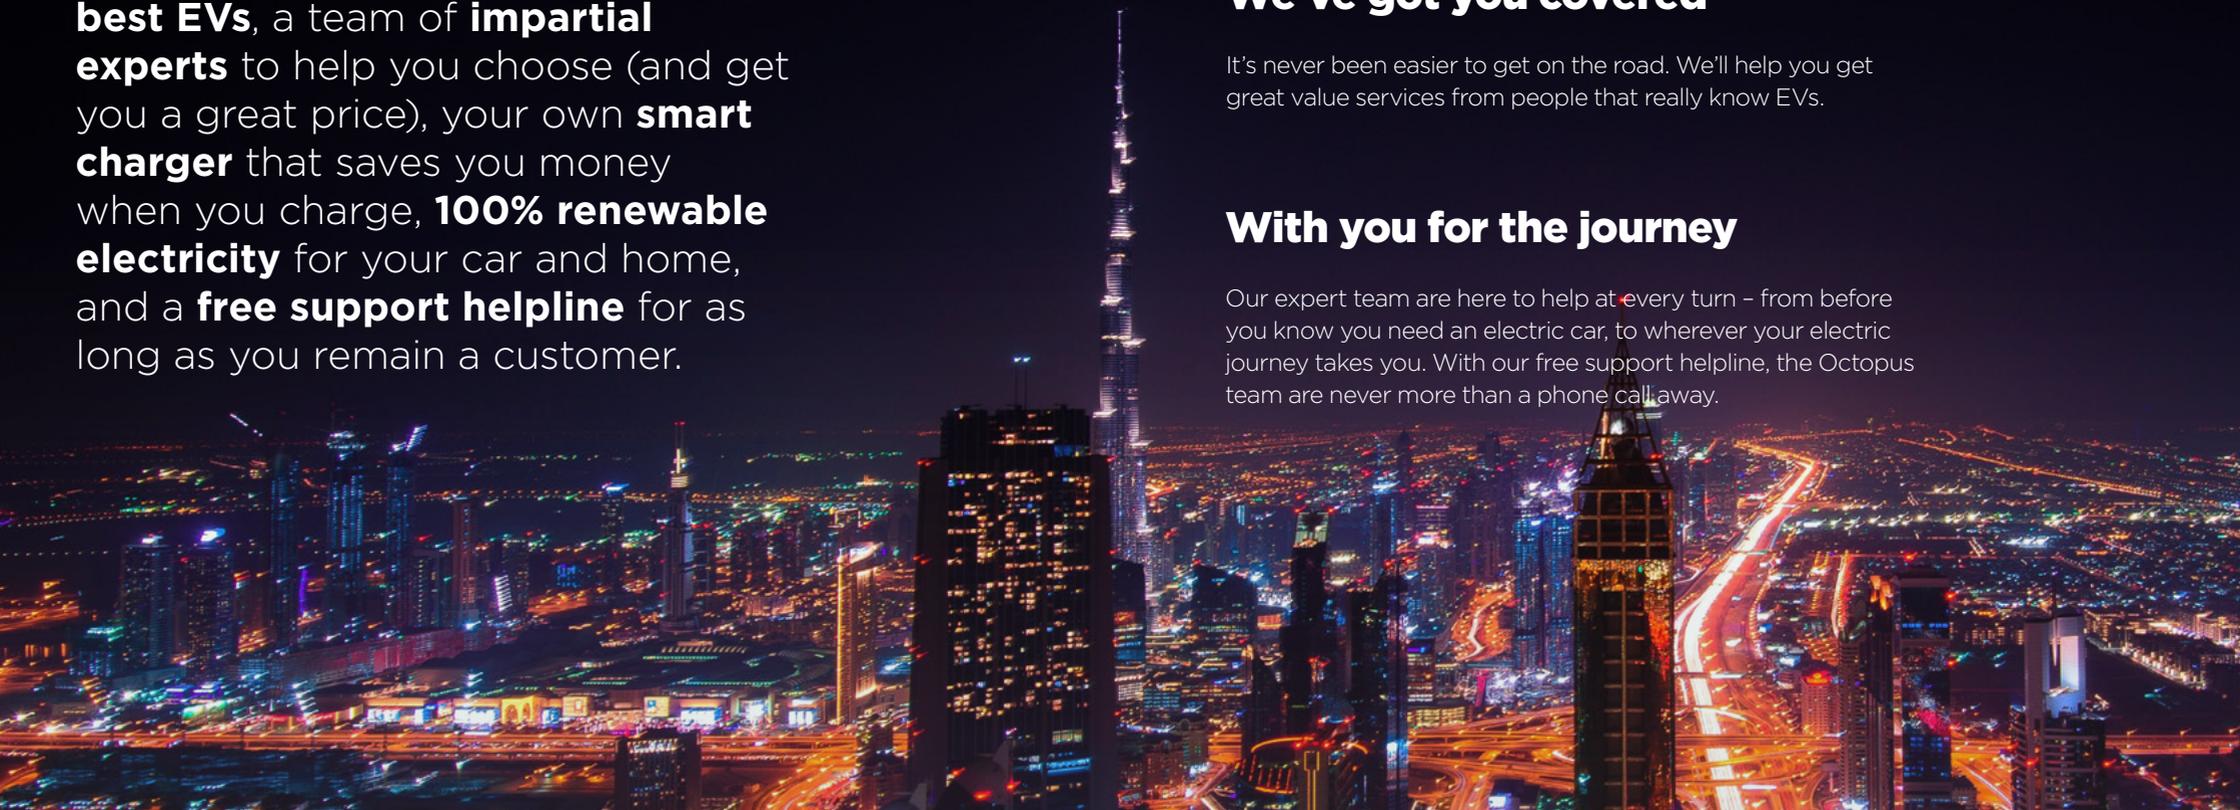

Get an Octopus Energy smart charger that charges whenever it's cheapest and Octopus Energy Go, the 100% renewable electricity tariff designed for EV drivers – featuring 4 hours of super-cheap electricity at just 5p / kWh.

Tyres? Insurance? Service? We've got you covered

It's never been easier to get on the road. We'll help you get great value services from people that really know EVs.

With you for the journey

Our expert team are here to help at every turn – from before you know you need an electric car, to wherever your electric journey takes you. With our free support helpline, the Octopus team are never more than a phone call away.

“For many of our customers, their Octopus EV is the first electric vehicle they've driven.

That's why I make sure they're looked after every step of the way - from getting the car, charging it, and everything they need on the road, we've got them covered.”

Liberty Hanson
